DIAGNOSIS

Chest Pain (R07.9)
Rule out coronary cause (STEE advised)

MEDICATIONS

#	Medication Name	Dosage	Frequency	Duration	Remarks
1	**Aspirin 75 mg** (EC Low Dose)	1 tablet	Once daily (after food)	5 days	For heart protective (anti-platelet action)
2	**Atorvastatin 20 mg**	1 tablet	Once daily (at night)	5 days	To control cholesterol
3	**Pantoprazole 40 mg**	1 tablet	Once daily (before breakfast)	5 days	To protect stomach (mild or aspirin)
4	**Nitroglycerin 0.4 mg** (Sublingual)	1 tablet (as needed)	For chest pain (max 3 doses in 15 minutes)	As needed	If chest pain persists, seek immediate medical attention

GENERAL CLINICAL & DIETARY ADVICE

- Rest and avoid strenuous physical activity.
- Take plenty of water (at least 8 - 10 glasses per day).
- Follow a heart-healthy diet low in salt, low fat, more fruits and vegetables.
- Avoid junk food, oily and spicy food.
- Do not smoke and avoid alcohol.
- If chest pain increases, is persistent, or is associated with shortness of breath, sweating, nausea, or fainting, seek emergency medical care immediately.

FOLLOW UP

After 3 days or earlier if symptoms worsen.
